### **Palomar Pomerado Health Mission Statement:**

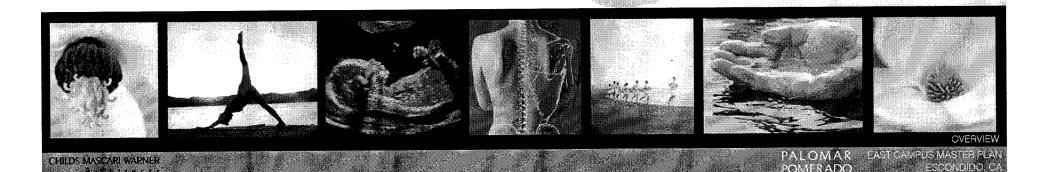

"The Mission of Palomar Pomerado Health is to Heal, Comfort and Promote Health in the Communities We Serve."

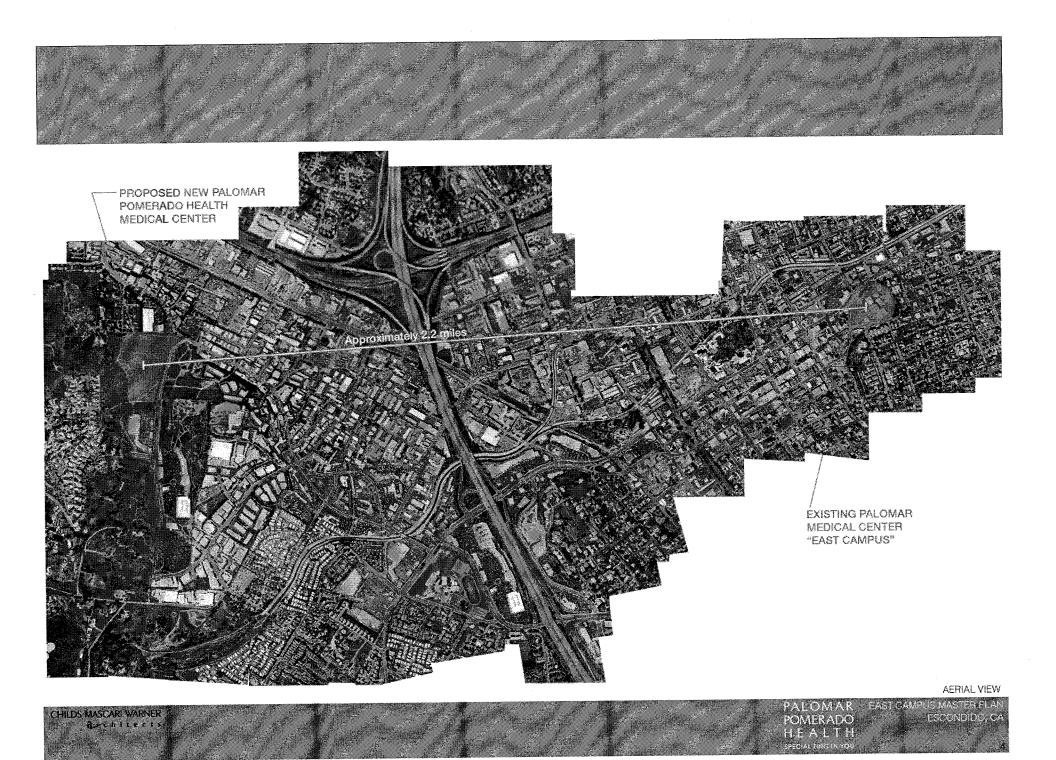

### **Designers Thoughts:**

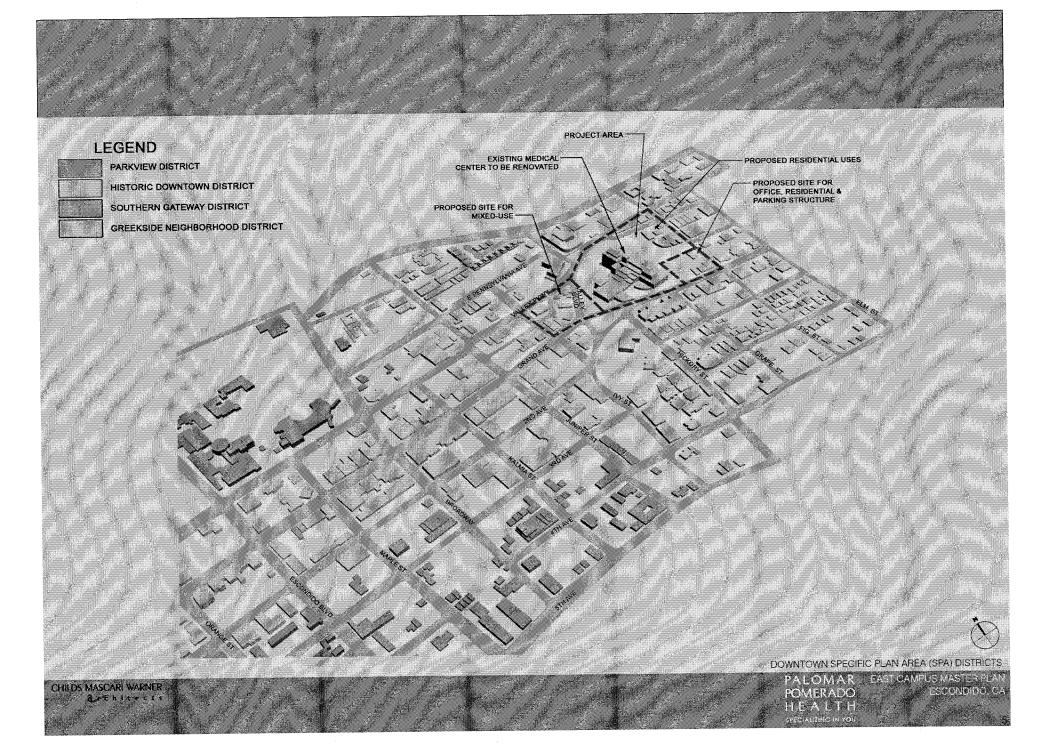

Rebirth - the act of becoming anew. Palomar Hospital is on the brink of just this. With a strong new vision this once acute care campus will become a center for wellness; a place that embraces health through programs such as; Health Fitness, Spa, Ambulatory Surgery, Education, Behavioral Health, Rehabilitation and Oncology. Combine this with places to house people, both permanent and transitory, eateries and shops and a true community center will bloom.

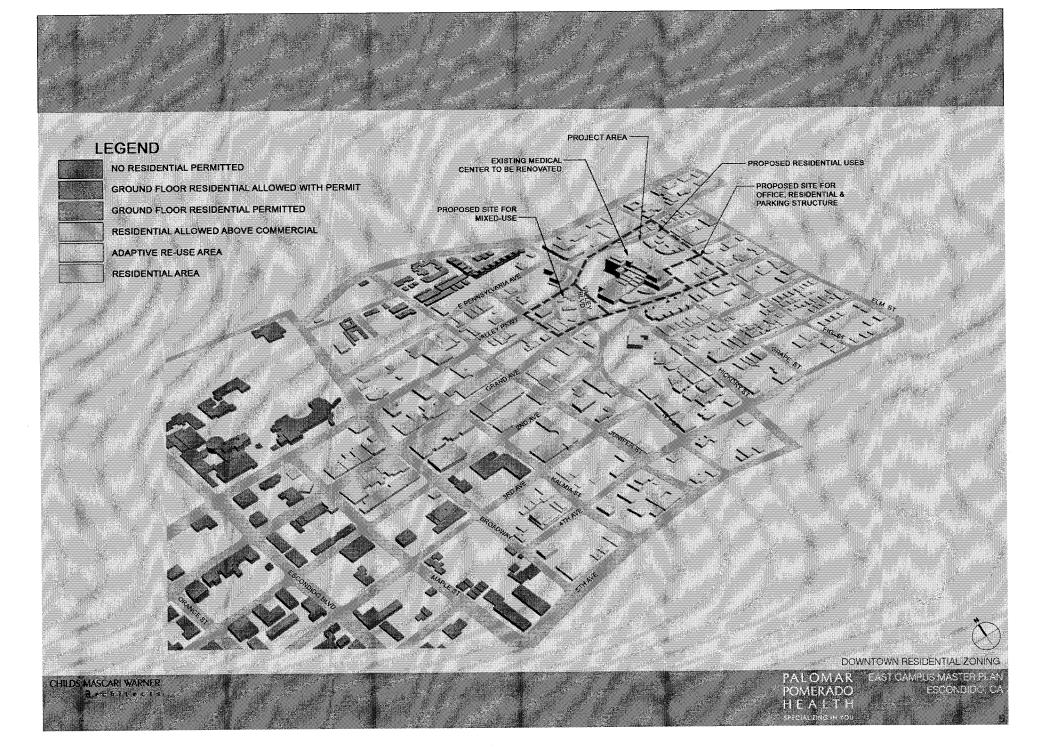

The proposed Master Plan concept abstracts from the traditions of old Escondido. Subtle references to past heritage are found throughout the campus, via landscape and architectural design. Groves of walnut, citrus, olive and avocado trees celebrate Escondido's agricultural background. Shops and eateries face the streets, continuing the Grand Avenue experience. The residences and plazas represent the strength of community and family prevalent, not only in the past but also the present for the City of Escondido. Finally, numerous places for display of the arts further enhance the wellness campus, as well as the downtown area.

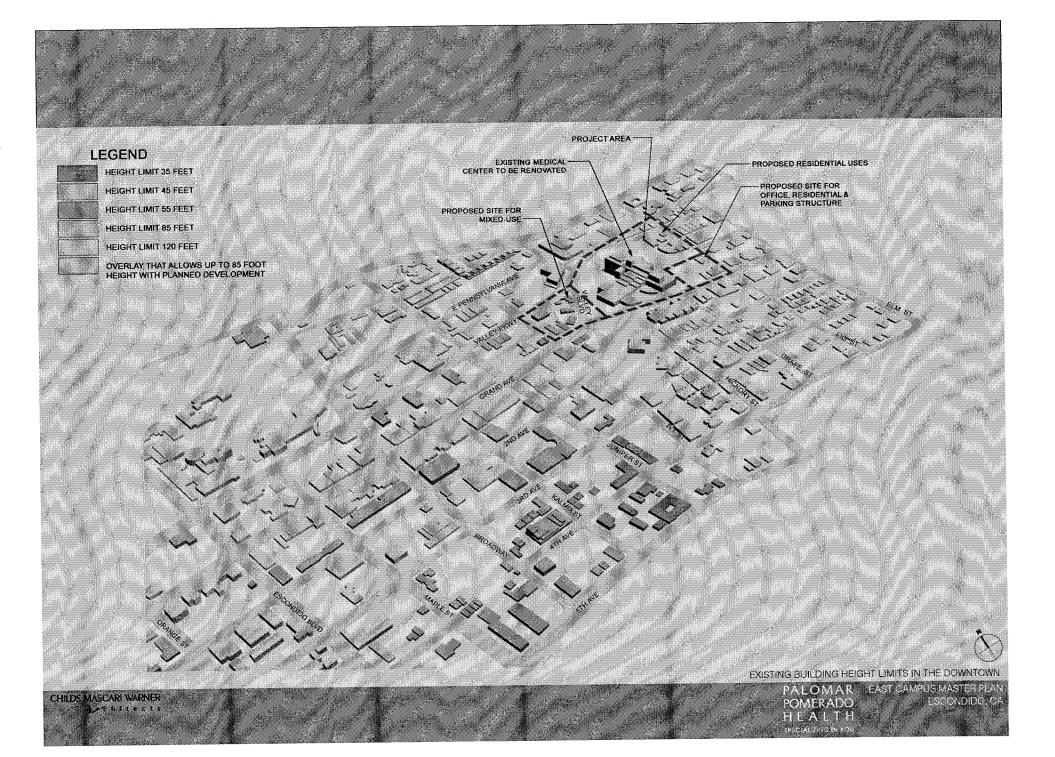

Revitalizing the existing buildings brings economy to such an undertaking, as well as partnering with independent developers to fund the retail and housing components. Opportunity to incorporate affordable housing contributes to the place. Palomar Hospital has long sat in the heart of downtown Escondido watching over its people with a quaint prestige. Now that many of the existing hospital functions are relocating to the West, a renewed energy will take its place, to provide an ever stronger mission for the community - one of wellness and hope - life and tranquility.
